

FAQ on Bachelor of Engineering Science (Aerospace Operations)

1. How will this programme help me with my career advancement ?

The aim of this course is to prepare the participants in the aviation industry for their career advancement. Engineers and technicians usually come from a strong technical background. This course provides the participants with the necessary skills to proceed to the next level of command. Management skills like accounting, finance, economics and analytical modeling aims to prepare the participants to be a leader in the aviation industry.

2. I am doing shift work, will this affect my attendance ?

A lot of our participants come from the aviation industry and this is a common issue. Still a lot of the applicants are able to complete this course, as the timetable is not very tight besides the lecture week (intensive week when the lecturer comes in to complete all the lecturers for that module in about a weeks time).

3. Why is the time commitment for this programme so little ?

Typical Bachelor of Engineering Science programmes usually requires 3 years of study on a full time basis. Even with an Engineering Diploma, local universities in Singapore usually grant 1 full year of exemption.

This programme offered jointly by UTS and ATTC is actually a 1-year full-time degree programme. On a part time basis, it is spread over 2 years. This is due to the maximum advance standing granted by UTS for all Engineering Diploma holders (or equivalent) in Singapore.

Normal Programme Duration	3 years full-time	
UTS BEngSc with Max adv standing	Max Advance standing	1 yr full-time

Table 3: Maximum Advance standing offered by UTS

4. My company is not supporting me financially for this programme. How can I afford to pay for the \$18,000 course fee ?

The course fee of \$18,000 (excluding GST) for this 2 years part time programme is not collected all at once.

The participants only needs to pay for each semester before it begins.
