

# Executive Introduction to MRO

## Course Synopsis

The course is designed to give participants an overview of MRO operation and the principle of maintenance to ensure effective use of the key asset of air transport – the aircraft. Participants will learn about aircraft maintenance philosophy, airworthiness control and how MRO facilities are organised.

The lecturer will share his experience in development of processes and systems used in MRO operation over each generation of commercial aircraft. The challenges of decision making in an environment of conflicting requirements of economics, safety and reliability will be discussed.

## Who Should Attend
